

TIM SULLIVAN

Product systems proof packet.

Public review routes for mobile product logic, evidence workflows, validation gates, generated artifacts, and delivery proof.

LIVE PACKET

Scan or open the site to inspect the live proof route.

Fast proof route for public review.

Skim the route, run the lab, inspect the code, then verify the artifact trail.

INTERACTIVE PROOF CONSOLE

Choose a build. Open proof.

- 01 SquadBrain: adaptive practice -> validated results
- 02 Lasting Ground: source lanes -> packet output
- 03 Review route: packet -> lab -> examples

DEMO

Open product surfaces

Live project pages and browser routes.

EXAMPLES

Inspect code paths

Executable TypeScript and Python examples.

COVERAGE

Check tests

Coverage summaries and CI-backed checks.

PACKET

Review output

Generated packets and proof-route artifacts.

Two builds. One proof standard.

Each project is shown as product surface, operating logic, validation boundary, and inspectable public artifact.

MOBILE

IMPLEMENTATION RECEIPTS

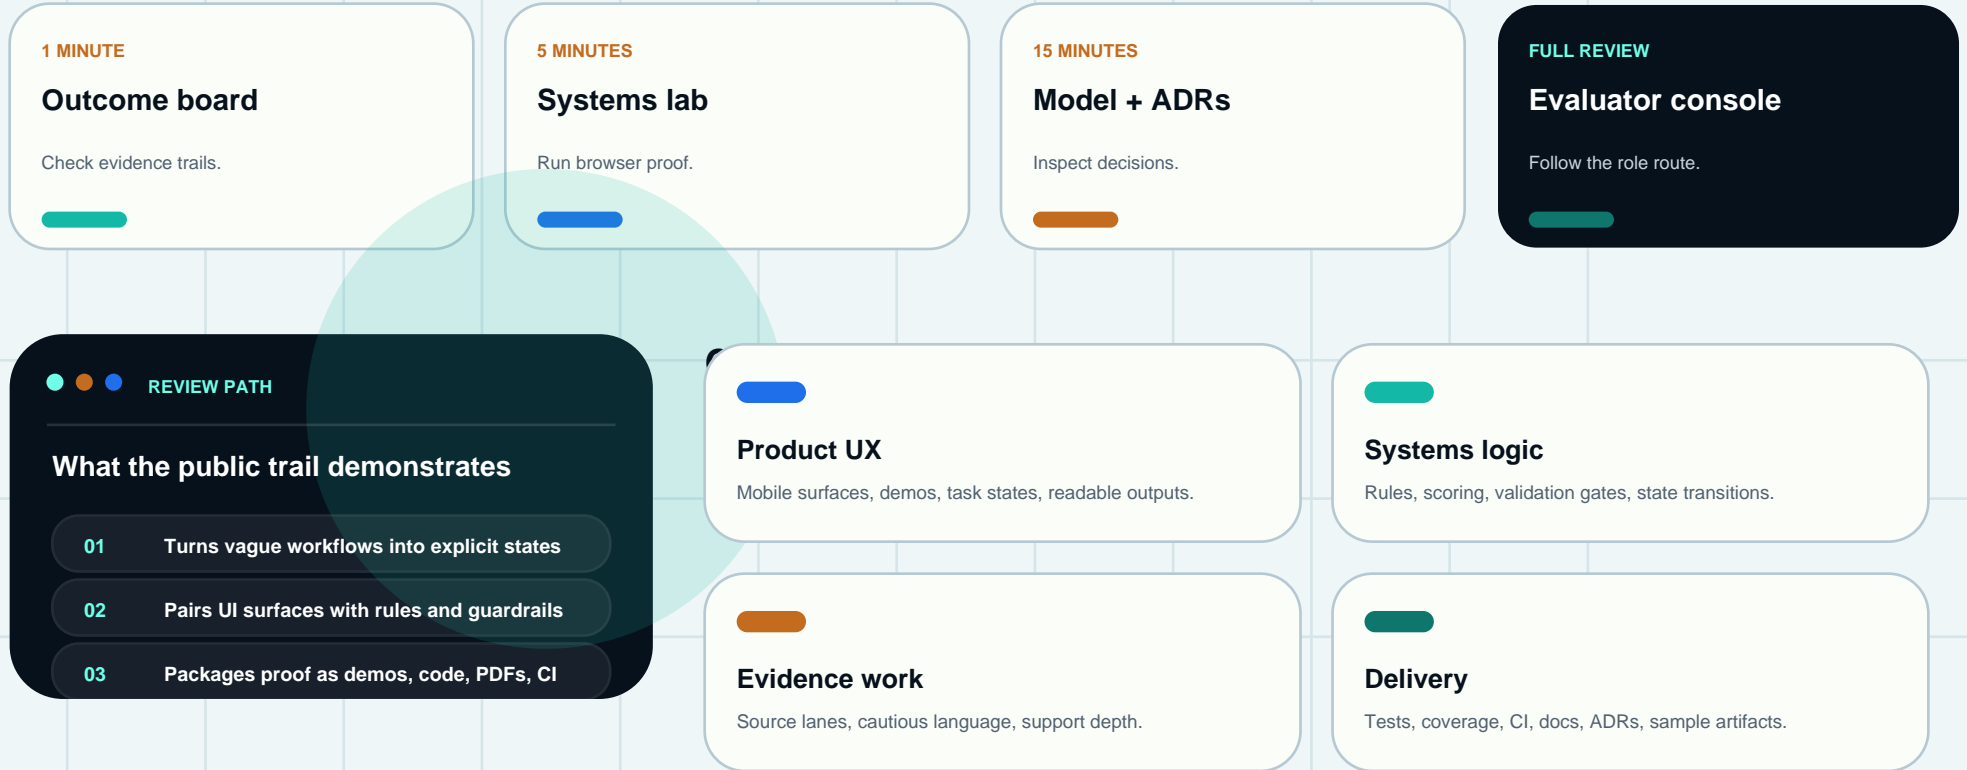

Layer	SquadBrain	Lasting Ground	Public route	Proof type
Surface	Mobile game loop, quick match, progress states	Packet review page and sample PDF surface	Demos and case studies	UX / product
Logic	Adaptive priority, matchmaking, ranking movement	Source lanes, evidence scoring, support depth	Examples folders	Executable code
Guardrail	Recomputed results and risk flags	Cautious language and visible source gaps	Tests + coverage	Validation
Artifact	ADRs, coverage summary, live demo	Sample PDF, coverage summary, evaluator guide	Packet + repo docs	Delivery proof

QUALITY RULE

Claims route to working product evidence, executable examples, tests, coverage, decision records, or generated outputs.

Choose depth. Open receipts. Decide fast.

A reviewer should know where to skim, what to run, and which artifacts prove the implementation trail.

BOTTOM LINE

The public surface now behaves like a review system: route, run, inspect, verify.

It shows product judgment, operating logic, evidence discipline, and delivery maturity without making a reviewer guess.
